

PAA Academics

1. Academic Assistance: PAA provides free tutoring for all students Sunday-Thursday in our dorm. Teachers also have a daily scheduled Flex Block from 11:05 -12:00. During this time, all teachers are in their classrooms to assist student learning.
2. Student-Teacher Ratio (9-1): The smaller campus environment allows PAA students to access a staff member for any kind of support needed. There are 9 students for every one staff, and every enrolled student and alumni is known by name.
3. Spiritual Growth: PAA's programming makes Bible study and spiritual growth a part of everyday life. Students are not afraid to ask hard questions about faith and teachers are committed to the process of discovery.
4. Athletics: PAA's athletics program is growing and improving, granting skilled students the opportunity to participate in leagues without Sabbath conflicts, and play in more than four annual Christian tournaments. Our coaches bring a spiritual element to the physical challenge of volleyball, flag-football, basketball, soccer, cross-country running, track and field and our Acronaire tumbling team.
5. Extracurricular Activities: student-led praise teams, Student Association government, class government, Dorm Club, a fully equipped fitness centre, and many other campus activities provide students with a busy, well-rounded schedule of events.
6. Campus Facilities: PAA shares the campus with Burman University in the city of Lacombe, Alberta, Canada. PAA's students and staff have full access to a modern university campus, with amenities such as a large library, science centre, auditorium, music building, art centre, athletic fields, and a gymnasium with a fitness centre, pool, climbing wall, racquetball courts, and an outdoor skating rink.
7. Safe and Caring Campus: In a recent survey, 94% of PAA's students and parents rate PAA as having a safe and caring environment. There are activities to facilitate friendships between students, with a zero-tolerance for bullying. The classes, campus activities, and student-led programming all work to reinforce relationships that outlast a student's time here at PAA.
